EDUCATION

University of California, Berkeley Aug. 2026 — May. 2027
Master of Engineering, Electrical Engineering and Computer Sciences (EECS)

National Taiwan University (NTU) Sept. 2021 — Jun. 2026
Bachelor of Business Administration in Information Management

WORK EXPERIENCE

National Taiwan University Feb. 2026 — Present
Software Engineer Intern
- Developed a responsive web application using React, TypeScript, and Tailwind CSS to visualize real-time AI analysis, serving 160+ students and professors across 4 university courses.
- Implemented a full-stack chatbot service utilizing Gemini File Search and native Gemini APIs for RAG-driven query responses, paired with a Next.js admin dashboard to track system metrics and audit chat logs.

Appier Aug. 2025 — Dec. 2025
Technical Solution Engineer Intern
- Created a multi-agent system using Google Agent Development Kit (ADK) and Model Context Protocol (MCP), enabling automated knowledge retrieval and task orchestration to enhance technical support services.
- Resolved 20+ Jira tickets related to customer data platform pipelines, data quality issues, and API integrations.
- Deployed and designed a secure SFTP server on Linux virtual machines using Shell Script, implementing chroot jail isolation, user access controls, and robust logging to enforce strict data privacy.

Microsoft Jul. 2024 — Jun. 2025
Technical Architect Intern
- Built a multi-agent system using Azure, RAG, and AutoGen to enhance clients' operational process efficiency.
- Developed a Microsoft Teams bot integrated with Azure, Copilot, and Graph API to facilitate internal communication.
- Implemented a Proof of Concept (PoC) for fine-tuning and deploying Small Language Models (SLM) with Azure.
- Authored technical documentations for Azure AI services to support internal knowledge sharing and delivered technical demonstrations for 10+ executive-level client tours to drive product adoption.

PwC Taiwan Feb. 2024 — Jun. 2024
Application Consultant Intern
- Developed an end-to-end Python data pipeline that fetched issue status via Jira API and automated PDF report generation, cutting weekly manual reporting overhead by 50%.
- Designed and implemented modular, responsive Vue.js and Bootstrap components for a data visualization dashboard, enabling consultants to monitor real-time project metrics.

DBS Bank Jul. 2023 — Aug. 2023
Data Engineer Intern
- Implemented custom Python automation pipelines to securely migrate 10,000+ financial transaction records, ensuring zero data loss during system migration.
- Developed data processing scripts and interactive dashboards using Python and Tableau to centralize business metrics, reducing daily executive decision-making time by 40%.

SKILLS

Programming Languages: Python, JavaScript/TypeScript, C/C++, SQL, Shell Script
Web Development: HTML/CSS, React.js, Vue.js, Next.js, Node.js, FastAPI, Bootstrap, Figma
Tools & Technologies: Azure, Google Cloud Platform (GCP), Git, GitHub, Docker
Database: MongoDB, PostgreSQL, MySQL
Spoken Languages: Mandarin Chinese (Native), English (Fluent)
