EDUCATION

National Taiwan University (NTU) Sept. 2021 — Jun. 2026

Bachelor of Business Administration, Information Management

- Relevant Coursework: Algorithms, Data Structure, Linear Algebra, Operating Systems, System Analysis and Design, Computer Networks, Database Management, Data Science

Université Catholique de Lille Jan. 2026 — Jun. 2026

Exchange Student of JUNIA ISEN, Master's in Software Engineering and Information Systems

- Relevant Coursework: Natural Language Processing, Advanced Machine Learning, Linux Programming, Web Technologies

WORK EXPERIENCE

Appier Aug. 2025 — Dec. 2025

Technical Solution Engineer Intern

- Created a multi-agent system using Google Agent Development Kit (ADK) and Model Context Protocol (MCP), enabling automated knowledge retrieval and task orchestration to enhance technical support services.
- Resolved 20+ Jira tickets related to customer data platform pipelines, data quality issues, and API integrations.
- Built a secure SFTP server with configurations including user isolation, chroot environments, logging, and access control.

Microsoft Jul. 2024 — Jun. 2025

Technical Architect Intern

- Built a multi-agent system using Azure, RAG, and AutoGen to enhance clients' operational process efficiency.
- Developed a Microsoft Teams bot integrated with Azure, Copilot, and Graph API to facilitate internal communication.
- Implemented a Proof of Concept (PoC) for fine-tuning and deploying Small Language Models (SLM) with Azure.
- Created demonstrations and documentations for Azure AI/Data services to support internal knowledge sharing.
- Delivered technical assistance for 10+ official tours, showcasing Microsoft's latest technologies to clients.

PwC Taiwan Feb. 2024 — Jun. 2024

Application Consultant Intern

- Built a Python-based automated ETL pipeline for weekly reports, reducing manual data processing time by 50%.
- Developed responsive and interactive UI components with HTML/CSS, Vue.js, and Bootstrap to enhance user experience.
- Automated Jira workflows to streamline cross-functional collaboration, resulting in a 20% decrease of time.

DBS Bank Jul. 2023 — Aug. 2023

Operations Intelligence Intern

- Developed Python-based robotic process automation (RPA) tools incorporating web scraping and ETL pipelines to process large-scale transaction records, enabling seamless system migration from Citibank.
- Performed data analysis by creating dashboards in Python and Excel, reducing daily decision-making time by 40%.

RESEARCH EXPERIENCE

California State University, Bakersfield & NTU Productivity Optimization Lab Feb. 2024 — Dec. 2024

Research Assistant, Advisor: Prof. Chia-Yen Lee & Prof. Tzu-Fen Chang

- Collaborated with a team of 6 to develop a GraphRAG-based news content analysis tool, leveraging LLMs for insight extraction from large datasets and reducing manual effort in social science research.
- Applied NLP techniques such as LDA and NMF to analyze attitude shifts surrounding the 2021 Atlanta spa shootings.

NTU FinDA Research Lab Apr. 2024 — Oct. 2024

Research Assistant, Advisor: Prof. Chen-Ting Lien

- Conducted Python-based data analysis on financial datasets, contributing insights for academic publication.
- Validated and extended published data models to support ongoing research and generate actionable insights.

SELECTIVE PROJECTS

TSMC - Earthquake Event Logging and Alert System Feb. 2025 — Jun. 2025

Software Engineer Trainee

- Designed a real-time event-driven system architecture with TypeScript, Node.js, Express, RESTful APIs, and GCP.
- Developed a robust quality assurance framework, including Jest unit tests and system health dashboards with performance metrics, to ensure the accuracy of alert classification logic, API correctness, and system stability.

IBM Taiwan & NTU Talent Cultivating Program - Demand Prediction Sept. 2023 — Dec. 2023

Data Scientist Trainee

- Built an end-to-end data pipeline to forecast product demand using machine learning and time-series models (Linear Regression, Random Forest, XGBoost, LSTM), improving procurement accuracy and reducing projected food waste.
- Designed a procurement prediction dashboard with model outputs to support store managers across 21 branches.

Junyi Academy & NTU Data Analytics Club - Data Quality Optimization Sept. 2023 — Dec. 2023

Data Scientist Trainee

- Identified behavioral patterns and key user segments with unsupervised learning methods, including K-means and DBSCAN.
- Designed four statistical metrics to assess material quality and support data-driven strategies with regression models.

LEADERSHIP & COMMUNITY ENGAGEMENT

NTU Global Initiatives Symposium Sept. 2023 — Jun. 2024

Officer of Academic and Curations

- Led the ideation of the forum's Artificial Intelligence theme, conducting research for keynote speakers and panel sessions.
- Supervised a team of four to develop AI-related workshop and competition content, synthesizing emerging AI trends (e.g., ethics, Generative AI, industry application) into actionable discussion frameworks for over 100 participants.

SKILLS

Programming Languages: Python, JavaScript/TypeScript, C/C++, SQL, Shell Script

Web Development: HTML/CSS, React.js, Vue.js, Next.js, Node.js, FastAPI, Bootstrap, Figma

Tools & Technologies: Azure, Google Cloud Platform (GCP), Git, GitHub, Docker

Database: MongoDB, PostgreSQL, MySQL

Spoken Languages: Mandarin Chinese (Native), English (Fluent)
